From: Loren D. Meinz, Department of Public Works

Re: Pet Waste Stickers for Trash Containers in Parks

Attached is a packet of the referenced stickers for use on trash containers in Rio Rancho parks. Please install on any trash containers you feel appropriate, particularly where people regularly walk their dogs.

The City is regulated by EPA to provide public information on storm water pollution, and dog waste has been shown to be a significant source of bacteria in storm water runoff. This effort will help get attention of dog owners to help clean up after their dogs.

For our data reporting to EPA, if you would keep tract of a list of the parks as these are installed, and e-mail that list to me, I will use that data in our annual report to EPA.

Thanks for your help.

Loren

Re: **Notice to Building Contractors – attachment for building permits**

As part of the EPA requirements for the Storm Water Quality Program, the Department of Public Works is providing public information and education on activities that can adversely affect storm water runoff. One of those items is trash and debris that can end up in storm drainage systems and arroyos, and eventually get washed downstream to the Rio Grande.

Much of the trash is generated by workers at construction sites, and then carried off - site by windy conditions. This information sheet is intended to increase awareness of the problem, and encourage people to properly dispose of their trash.

Please attach this notice to all building permits as they are issued. The form is copier friendly, so feel free to reproduce as needed. I have enclosed 100 copies for a start, and if you want us to furnish more, just e-mail and we will make more.

Thanks for your help.

Loren D. Meinz
