

**BASE Buildings Test Space Characteristics:** Space Use and Ventilation Modifications

Modifications from Original Design of Building	Number of Buildings Reporting	
	Space Use Modification <sup>1</sup>	Ventilation System Modification <sup>2</sup>
Test Spaces Having Modification Shown	25	50

Notes:  
<sup>1</sup>Space use modifications as reported for all BASE buildings (n=100).  
<sup>2</sup>Data represent 99 BASE buildings indicating a response for ventilation system modification. One building did not report a response.

Variable Descriptions:

**Space Use Modification** refers to a test space where the current space use has changed from the original building space use (i.e., warehouse to office space).

**Ventilation System Modification** refers to a test space that has had modification made to the heating, ventilating, and air conditioning systems compared to that originally installed.
