

BASE Buildings Test Space Pollutant Sources: Location of Water Damage - Past and Current Water Damage in Test Space

Location of Water Damage	Number of Buildings Reporting	
	Past Water Damage ¹	Current Water Damage ²
Basement	2	0
Roof	9	5
Mechanical Rooms	4	3
Occupied Space	32	14
Total Number of Buildings Reporting	41	20

Notes:
¹Number of buildings based on those test spaces reporting past water damage (n=41). Number of buildings in column may add up to greater than the total number of buildings as some test spaces indicated more than one location for past water damage.
²Number of buildings based on those test spaces reporting current water damage (n=20). Number of buildings in column may add up to greater than the total number of buildings as some test spaces indicated more than one location for current water damage.

Variable Descriptions:

Past Water Damage refers to water damage that occurred in the past but no longer existed at the time the building study was conducted.

Current Water Damage refers to water damage that existed at the time the building study was conducted.

For both current and past water damage, the following categories apply:

Basement refers to basement water damage or water leaks.

Roof refers to water damage or water leaks occurring at the test space roof.

Mechanical rooms refers to water damage or leaks in the test space mechanical spaces.

Occupied space refers to water damage or leaks occurring in occupied areas of the test space.
