Description: MDEP – All Bid Contracts

To reduce volatile organic compounds (VOCs), carbon monoxide (CO), and particulate matter (PM), MDEP requires contractors to retrofit equipment with EPA and/or California Air Resources Board (CARB) verified technologies. Idle reduction and dust and odor control are also addressed.

Massachusetts Highway Department

Section 3.00

Award and Execution of the Contract

3.041 Certification of Construction Equipment Standard Compliance Requirement.

The Contractor shall certify that any and all large non-road diesel construction equipment (greater than 50 horsepower) used on this contract have emission control devices installed, such as oxidation catalysts or particulate filters, on the exhaust system side of the diesel combustion engine equipment.

The Certification of Construction Equipment Standard Compliance form shall be sent with the notification of award to the successful bidder, who shall execute and deliver the said form within 14 days after the date of the notice of award.

Should the successful bidder fail to execute the said form, MassHighway may, at its option, determine that the Contractor has abandoned the Contract, and shall take action in accordance with the Standard Specifications for Highways and Bridges, Subsection **3.06 - Failure to Execute Contract**.
