

**Air Toxics Risk Assessment Reference Library  
Volume 1  
Technical Resource Manual**

Prepared by:  
ICF Consulting  
Fairfax, Virginia

Prepared for:

Nona Smoke, Project Officer  
Office of Policy Analysis and Review  
Contract No. EP-D-04-005  
Work Assignment No. 0-2

Rachael Schwartz, Project Officer  
Clean Air Marketing Division  
Contract No. 68-W-03-028  
Work Assignment No. 11

Bruce Moore, Project Officer  
Office of Air Quality Planning and Standards  
Contract No. 68-D01-052  
Work Assignment No. 0-08  
Work Assignment No. 0-09

U.S. Environmental Protection Agency  
Office of Air Quality Planning and Standards  
Emissions Standards Division  
Research Triangle Park, NC

## **Disclaimer**

The information and procedures set forth here are intended as a technical resource to those conducting air toxics risk assessments. This Technical Resource Document does not constitute rulemaking by the Agency, and cannot be relied on to create a substantive or procedural right enforceable by any party in litigation with the United States. As indicated by the use of non-mandatory language such as “may” and “should,” it provides recommendations and does not impose any legally binding requirements.

The statutory provisions and EPA regulations described in this document contain legally binding requirements. This document is not a regulation itself, nor does it change or substitute for those provisions and regulations. While EPA has made every effort to ensure the accuracy of the discussion in this guidance, the obligations of the regulated community are determined by statutes, regulations, or other legally binding requirements. In the event of a conflict between the discussion in this document and any statute or regulation, this document would not be controlling.

The general description provided here may not apply to a particular situation based upon the circumstances. Interested parties are free to raise questions and objections about the substance of this guidance and the appropriateness of the application of this guidance to a particular situation. EPA and other decision makers retain the discretion to adopt approaches on a case-by-case basis that differ from those described in this guidance where appropriate. EPA may take action that is at variance with the recommendations and procedures in this document and may change them at any time without public notice. This is a living document and may be revised periodically. EPA welcomes public input on this document at any time.

Reference herein to any specific commercial products, process, or service by trade name, trademark, manufacturer, or otherwise, does not necessarily constitute or imply its endorsement, recommendation, or favoring by the United States Government.

## **Acknowledgments**

The U.S. Environmental Protection Agency's Air Toxics Risk Assessment reference library is a product of the EPA's Office of Air Quality, Planning, and Standards (OAQPS) in conjunction with EPA Regions 4 and 6 and the Office of Policy Analysis and Review. The interoffice technical working group responsible for library development includes Dr. Kenneth L. Mitchell (Region 4), Dr. Roy L. Smith (OAQPS), Dr. Deirdre Murphy (OAQPS), and Dr. Dave Guinnup (OAQPS). In addition to formal peer review, an opportunity for review and comment on Volumes 1 and 2 of the library was provided to various stakeholders, including internal EPA reviewers, state and local air agencies, and the private sector. The working group would like to thank these many internal and external stakeholders for their assistance and helpful comments on various aspects of these two books. (Volume 3 of the library is currently under development and is expected in late 2004.) The library is being prepared under contract to the U.S. EPA by ICF Consulting, Robert Hegner, Ph.D., Project Manager.

# Authors, Contributors, and Reviewers

## Authors

Kenneth L. Mitchell, Ph.D.  
U.S. EPA Region 4

Roy L. Smith, Ph.D.  
U.S. EPA OAQPS

Deirdre Murphy, Ph.D.  
U.S. EPA OAQPS

## External Peer Reviewers

Doug Crawford-Brown, Ph.D., University of North Carolina at Chapel Hill  
Michael Dourson, Ph.D., D.A.B.T., Toxicology Excellence for Risk Assessment  
Eric Hack, M.S., Toxicology Excellence for Risk Assessment  
Bruce Hope, Ph.D., Oregon Department of Environmental Quality  
Howard Feldman, M.S., American Petroleum Institute  
Barbara Morin, Rhode Island Department of Environmental Management  
Patricia Nance, M.A., M.Ed., Toxicology Excellence for Risk Assessment  
Charles Pittinger, Ph.D., Toxicology Excellence for Risk Assessment, Exponent

## Additional Contributors & Reviewers

John Ackermann, Ph.D., U.S. EPA Region 4  
Carol Bellizzi, U.S. EPA Region 2  
George Bollweg, U.S. EPA OAQPS

# Table of Contents

## **PART I      BACKGROUND**

### **Chapter 1      Introduction**

1.1	Introduction .....	1
1.2	The Special Concerns of Urban Areas .....	2
1.3	Promoting Localized Assessment .....	4
1.4	The Risk-Based Approach .....	4
1.5	The Purpose of this Reference Manual .....	5
1.6	The Layout of this Reference Manual .....	6
1.7	The Relationship of this Manual to Volumes 2 and 3 .....	9
	References .....	10

### **Chapter 2      Clean Air Act Requirements and Programs to Regulate Air Toxics**

2.1	Introduction .....	1
2.2	HAPs and their Sources: Stationary, Mobile, and Indoor Sources .....	2
2.2.1	Hazardous Air Pollutants (HAPs) .....	2
2.2.2	Stationary Sources: The Pre-1990 CAA “Risk-Only” Approach .....	4
2.2.3	Stationary Sources and the 1990 Clean Air Act Amendments: A “Technology First, Then Risk” Approach .....	4
2.2.3.1	Step 1: The Technology-based Approach .....	5
2.2.3.2	Step 2: The Risk-based Approach .....	5
2.2.4	Mobile Sources of Air Toxics Rule .....	6
2.2.5	Indoor Air and Indoor Air Toxics .....	8
2.2.5.1	Potential Sources of Indoor Air Toxics .....	9
2.2.5.2	Indoor Air Toxics .....	9
2.2.5.3	Health Risks and Indoor Pollutants .....	11
2.3	Progress in Understanding and Reducing Toxic Air Pollution .....	12
2.3.1	Trends .....	12
2.3.2	NATA National Scale Assessment .....	14
2.4	Other Air Pollutants of Potential Concern .....	16
2.4.1	Criteria Air Pollutants .....	16
2.4.2	Chemicals on the Toxics Release Inventory .....	20
2.4.3	Toxic Chemicals that Persist and Which Also May Bioaccumulate .....	21
2.4.4	Overlaps and Differences Between Chemical “Lists” .....	22

2.5	Reports to Congress on Air Toxics Issues .....	23
2.5.1	Air Toxics Deposition to the Great Waters .....	23
2.5.2	Mercury Study Report to Congress .....	24
2.5.3	Utility Report to Congress .....	25
2.5.4	Residual Risk Report to Congress .....	26
2.5.5	Integrated Urban Strategy Report to Congress .....	27
2.5.6	Other Reports .....	27
	References .....	27

### **Chapter 3 EPA's Risk Assessment Process for Air Toxics: History and Overview**

3.1	Introduction .....	1
3.2	A Short History of the Development of Human Health Risk Assessment and Risk Management Approaches for Air Toxics .....	1
3.2.1	The 1983 National Academy of Sciences Report .....	1
3.2.2	The 1994 National Research Council Report .....	3
3.2.3	The CRARM .....	4
3.2.4	Development of Human Health Risk Assessment at EPA .....	6
3.3	Air Toxics Human Health Risk Assessment: Overview of the Process .....	9
3.3.1	Air Toxics Risk Assessment: What Is the Question? .....	10
3.3.2	Air Toxics Risk Assessment: The Process .....	12
3.3.2.1	Planning, Scoping, and Problem Formulation .....	13
3.3.2.2	Analysis Phase .....	14
3.3.2.3	Risk Characterization .....	15
3.3.3	Tiered Assessment Approaches .....	16
3.4	Uncertainty and Variability in Air Toxics Risk Assessment .....	18
3.4.1	Distinguishing Uncertainty and Variability .....	19
3.4.2	Sources of Uncertainty in Air Toxics Risk Assessment .....	20
3.4.3	Sources of Variability in Air Toxics Risk Assessment .....	22
3.4.4	Characterizing Uncertainty and Variability .....	23
3.4.5	Tiered Approach to Uncertainty and Variability .....	24
3.4.6	Assessment and Presentation of Uncertainty .....	26
	References .....	29

### **Chapter 4 Air Toxics: Chemicals, Sources, and Emissions Inventories**

4.1	Introduction .....	1
4.2	Air Toxics .....	1
4.2.1	Introduction to Air Toxics Chemical Lists .....	1
4.2.2	Hazardous Air Pollutants (HAPs) .....	4
4.2.3	Criteria Air Pollutants .....	5
4.2.4	Toxics Release Inventory (TRI) Chemicals .....	6
4.2.5	Toxic Chemicals That Persist and Which Also May Bioaccumulate .....	6
4.2.6	Other Chemicals .....	11
4.3	Sources of Air Toxics .....	11

4.3.1	Point Sources .....	12
4.3.2	Nonpoint Sources .....	13
4.3.3	On-Road and Nonroad Mobile Sources .....	14
4.3.4	Sources Not Included in the NEI or TRI .....	15
4.3.4.1	Indoor Sources .....	16
4.3.4.2	Natural Sources .....	18
4.3.4.3	Formation of Secondary Pollutants .....	19
4.3.4.4	Other Sources Not Included in NEI or TRI .....	20
4.4	Emissions Inventories .....	20
4.4.1	National Emissions Inventory (NEI) .....	21
4.4.2	Toxics Release Inventory (TRI) .....	25
	References .....	29

## **PART II HUMAN HEALTH RISK ASSESSMENT: INHALATION**

### **Chapter 5 Getting Started: Planning and Scoping the Inhalation Risk Assessment**

5.1	Introduction .....	1
5.2	Framework and Process for Air Toxics Risk Assessments .....	1
5.2.1	Framework for Cumulative Risk Assessment .....	1
5.2.2	General Framework for Residual Risk Assessment .....	3
5.2.3	The Air Toxics Risk Assessment Process .....	3
5.2.4	Overview of Inhalation Exposure Assessment .....	6
5.2.4.1	Exposure and Exposure Assessment: What's the Difference? .....	6
5.2.4.2	Components of an Exposure Assessment .....	7
5.3	Planning and Scoping .....	8
5.3.1	Why is Planning and Scoping Important? .....	9
5.3.2	The Planning and Scoping Process .....	9
5.3.2.1	What is the Concern? .....	9
5.3.2.2	Who Needs to be Involved? .....	10
5.3.2.3	What is the Scope? .....	12
5.3.2.4	Why is There a Problem? .....	13
5.3.2.5	How will Risk Managers Evaluate the Concern? .....	13
5.3.2.6	Lessons Learned on Planning and Scoping .....	13
	References .....	15

### **Chapter 6 Problem Formulation: Inhalation Risk Assessment**

6.1	Introduction .....	1
6.2	Developing the Conceptual Model .....	1
6.3	Developing the Analysis Plan .....	4
6.3.1	Identification of the Sources .....	5
6.3.2	Identification of the Chemicals of Potential Concern .....	6

6.3.2.1	Toxicity-Weighted Screening Analysis .....	6
6.3.2.2	Risk-Based Screening Analysis .....	7
6.3.3	Identification of the Exposure Pathways/Routes .....	8
6.3.3.1	Characteristics of the Assessment Area .....	12
6.3.3.2	Scale of the Assessment Area .....	14
6.3.3.3	Use of Modeling versus Monitoring .....	14
6.3.3.4	Estimation of Exposure .....	17
6.3.3.5	Evaluation of Uncertainty .....	20
6.3.3.6	Preparation of Documentation .....	20
6.3.4	Identification of the Exposed Population .....	20
6.3.5	Identification of the Endpoints and Metrics .....	21
6.4	Data Quality in the Risk Assessment Process .....	22
	References .....	24

## **Chapter 7      Quantification of Exposure: Development of the Emissions Inventory for the Inhalation Risk Assessment**

7.1	Introduction .....	1
7.2	Process for Developing an Emissions Inventory .....	1
7.2.1	Planning .....	2
7.2.2	Gathering Information .....	3
7.2.3	Estimating Emissions .....	3
7.2.3.1	Direct Measurement .....	5
7.2.3.2	Emission Estimation Models .....	5
7.2.3.3	Emission Factors .....	8
7.2.3.4	Mass Balance .....	9
7.2.3.5	Engineering Judgment .....	9
7.2.4	Compiling Data Into a Database .....	9
7.2.4.1	Selection of Production Rates .....	9
7.2.4.2	Unusual Conditions: Process Upsets, Accidental Releases, and Maintenance .....	11
7.2.5	Data Augmentation .....	12
7.2.6	Quality Assurance/Quality Control .....	13
7.2.7	Documentation .....	14
7.2.8	Access to Data .....	14
7.3	Data Sources .....	14
7.3.1	Permit Files .....	15
7.3.2	Regional Inventories .....	15
7.3.3	Industry Profiles .....	16
7.3.4	AP-42 Emissions Factors .....	17
7.3.5	Factor Information Retrieval System .....	17
7.3.6	Locating and Estimating Documents .....	18
7.3.7	RCRAInfo .....	18
7.3.8	Emissions and Dispersion Modeling System (EDMS) .....	19
7.3.9	Summary .....	19
	References .....	21

## **Chapter 8      Quantification of Exposure: Dispersion, Transport, and Fate of Air Toxics in the Atmosphere**

8.1	Introduction . . . . .	1
8.2	Dispersion and Atmospheric Transport of Air Pollutants . . . . .	1
8.2.1	General Types of Releases . . . . .	2
8.2.2	Characteristics of Releases that Affect Dispersion and Transport . . . . .	3
8.2.3	Physical and Meteorological Factors Affecting Air Toxics Dispersion and Transport . . . . .	7
8.3	Fate of Air Toxics in the Atmosphere . . . . .	13
8.3.1	Physical Processes Removing Air Toxics . . . . .	13
8.3.2	Chemical Reactions that Remove Air Toxics . . . . .	15
8.3.3	Chemical Reactions that Result in the Secondary Formation of Pollutants . . . . .	16
8.3.4	Overall Persistence of Air Toxics in the Atmosphere . . . . .	17
	References . . . . .	19

## **Chapter 9      Assessing Air Quality: Modeling**

9.1	Introduction . . . . .	1
9.2	Air Quality Modeling . . . . .	1
9.2.1	The Overall Structure of an Air Quality Model . . . . .	1
9.2.2	Types of Models: Scientific Principles . . . . .	6
9.2.3	Modeling Deposition . . . . .	7
9.2.4	Screening vs. Refined Models . . . . .	8
9.2.5	Specific Data Required for Modeling . . . . .	9
9.2.6	Sources of Air Quality Models and Information . . . . .	11
9.2.7	Examples of Air Quality Models . . . . .	12
9.2.8	Emissions from Soil . . . . .	18
9.3	Air Quality Modeling Examples . . . . .	19
	References . . . . .	19

## **Chapter 10     Assessing Air Quality: Monitoring**

10.1	Introduction . . . . .	1
10.2	Air Toxics Monitoring: Recent Advances . . . . .	2
10.3	Monitoring for Air Toxics Risk Assessments: Why Monitor? . . . . .	4
10.4	Planning for Air Toxics Monitoring . . . . .	9
10.4.1	General Planning Approach . . . . .	10
10.4.2	Specific Planning Issues . . . . .	14

10.5	Implementing Air Toxics Monitoring . . . . .	19
10.5.1	Locating Monitors and Selecting Sample Size . . . . .	19
10.5.1.1	Locating Monitors . . . . .	19
10.5.1.2	Selecting Sample Size . . . . .	24
10.5.1.3	Setting Up a Monitoring/Sampling Program . . . . .	25
10.5.2	Data Analysis and Reporting . . . . .	28
10.5.3	The Use of Monitoring Data to Calculate Exposure Concentrations . . . . .	29
10.6	Monitoring Methods, Technologies, and Costs . . . . .	31
10.6.1	Ambient Air Monitoring . . . . .	33
10.6.2	Sampling Costs . . . . .	35
10.7	Archiving Air Toxics Monitoring Data . . . . .	35
10.8	Using Air Monitoring Data to Evaluate Source Contribution . . . . .	37
	References . . . . .	38

## **Chapter 11     Estimating Inhalation Exposure**

11.1	Introduction . . . . .	1
11.2	Estimating Inhalation Exposure Concentrations . . . . .	1
11.2.1	General Approaches for Deriving Exposure Concentrations . . . . .	2
11.2.2	Common Ways to Estimate Exposure Concentrations . . . . .	3
11.3	Exposure Modeling . . . . .	6
11.3.1	Inhalation Exposure Modeling . . . . .	9
11.3.2	Microenvironment Concentration: How is it Developed? . . . . .	12
11.3.3	Sources of Data for Human Activity for Inhalation (and other) Exposure Assessments . . . . .	13
11.3.4	Examples of Inhalation Exposure Models . . . . .	16
11.3.5	Exposure Modeling Examples . . . . .	19
11.4	Personal Monitoring . . . . .	20
11.5	Exposure to a Population: Common Descriptors . . . . .	22
11.6	Evaluating Uncertainty . . . . .	22
11.7	Presenting the Results of an Exposure Assessment . . . . .	23
	References . . . . .	23

## **Chapter 12     Inhalation Toxicity Assessment**

12.1	Introduction . . . . .	1
12.1.1	Hazard Identification and Dose-Response Information . . . . .	1
12.1.2	Dose-Response Assessment Methods . . . . .	5

12.2	Hazard Identification .....	8
12.2.1	Weight of Evidence – Human Carcinogenicity .....	9
12.2.2	Identification of Critical Effect(s) – Non-Cancer Endpoints .....	11
12.3	Dose-Response Assessment for Cancer Effects .....	12
12.3.1	Determination of the Point of Departure (POD) .....	13
12.3.2	Derivation of the Human Equivalent Concentration .....	14
12.3.3	Extrapolation from POD to Derive Carcinogenic Potency Estimates .....	17
12.4	Dose-Response Assessment for Derivation of a Reference Concentration .....	19
12.4.1	Determination of the Point of Departure and Human Equivalent Concentration .....	20
12.4.2	Application of Uncertainty Factors .....	22
12.5	Sources of Chronic Dose-Response Values .....	24
12.6	Acute Exposure Reference Values .....	26
12.7	Evaluating Chemicals Lacking Health Reference Values .....	31
12.7.1	Use of Available Data Sources .....	31
12.7.2	Route-to-Route Extrapolation .....	31
12.8	Dose-Response Assessment for Mixtures .....	32
	References .....	35

## **Chapter 13     Inhalation Risk Characterization**

13.1	Introduction .....	1
13.2	Quantification of Cancer Risk and Noncancer Hazard .....	4
13.2.1	Cancer Risk Estimates .....	5
13.2.1.1	Characterization of Individual Pollutant Risk .....	5
13.2.1.2	Characterization of Cancer Risk from Exposure to Multiple Pollutants .....	6
13.2.2	Noncancer Hazard Estimates .....	8
13.2.2.1	Characterizing Individual Pollutant Hazard for Chronic Exposures .....	8
13.2.2.2	Characterizing Multiple Pollutant Hazard for Chronic Exposures .....	9
13.2.2.3	Characterizing Hazard for Acute Exposures .....	11
13.2.3	Quantifying Risk From Background Sources .....	12
13.3	Interpretation and Presentation of Inhalation Cancer Risks and Noncancer Hazards .....	13
13.3.1	Presenting Risk and Hazard Estimates .....	17
13.3.2	Exposure Estimates and Assumptions .....	17
13.3.3	Toxicity Estimates and Assumptions .....	18
13.3.4	Assessment and Presentation of Uncertainty in Risk Characterization .....	19
13.3.4.1	Practical Approaches to Uncertainty Assessment .....	20
13.3.4.2	Presentation of Uncertainty Assessment .....	23
13.3.5	Additional Information .....	23
	References .....	25

## **PART III HUMAN HEALTH RISK ASSESSMENT: MULTIPATHWAY**

### **Chapter 14 Overview and Getting Started: Planning and Scoping the Multipathway Risk Assessment**

14.1	Introduction . . . . .	1
14.2	Overview of Multipathway Air Toxics Risk Assessment . . . . .	3
14.2.1	Planning, Scoping, and Problem Formulation . . . . .	3
14.2.2	Analysis . . . . .	4
14.2.3	Risk Characterization . . . . .	5
14.3	Overview of Multipathway Exposure Assessment . . . . .	5
14.4	Planning and Scoping . . . . .	9
14.4.1	Identifying the Concern . . . . .	9
14.4.2	Identifying The Participants . . . . .	9
14.4.3	Determining the Scope of the Risk Assessment . . . . .	9
14.4.4	Describing the Problem . . . . .	10
14.4.5	Determining How Risk Managers Will Evaluate the Concern . . . . .	10
14.5	Tiered Multipathway Risk Assessments . . . . .	10
	References . . . . .	11

### **Chapter 15 Problem Formulation: Multipathway Risk Assessment**

15.1	Introduction . . . . .	1
15.2	Developing the Multipathway Conceptual Model . . . . .	1
15.3	Developing the Multipathway Analysis Plan . . . . .	2
15.3.1	Identification of the Sources . . . . .	3
15.3.2	Identification of the Chemicals of Potential Concern . . . . .	3
15.3.3	Identification of the Exposure Pathways/Routes . . . . .	3
15.3.3.1	Characteristics of the Assessment Area . . . . .	4
15.3.3.2	Scale of the Assessment Area . . . . .	5
15.3.3.3	Use of Modeling vs. Monitoring . . . . .	5
15.3.3.4	Quantitation of Exposure . . . . .	6
15.3.3.5	Evaluation of Uncertainty . . . . .	7
15.3.3.6	Preparation of the Documentation . . . . .	7
15.3.4	Identification of the Exposed Population . . . . .	7
15.3.5	Identification of Endpoints and Metrics . . . . .	7
15.4	Exposure Assessment Approach . . . . .	7
15.4.1	Scenario Approach . . . . .	8
15.4.2	Population-Based Approach . . . . .	11
	References . . . . .	12

**Chapter 16 Quantification of Exposure: Development of the Emissions Inventory for the Multipathway Risk Assessment**

16.1	Introduction . . . . .	1
16.2	Developing the Emissions Inventory . . . . .	1

**Chapter 17 Quantification of Exposure: Chemical and Physical Properties Affecting Multimedia Fate and Transport**

17.1	Introduction . . . . .	1
17.1.1	Measures of Persistence . . . . .	1
17.1.2	Metrics of Bioaccumulation . . . . .	5
17.2	Chemical and Physical Properties that Affect Persistence and Bioaccumulation . . . . .	8
17.3	Evaluating Persistence and Bioaccumulation in Exposure Assessments . . . . .	10
	References . . . . .	11

**Chapter 18 Quantification of Exposure: Multimedia Modeling**

18.1	Introduction . . . . .	1
18.2	Multimedia Fate and Transport Modeling . . . . .	1
18.2.1	Basis of Multimedia Models . . . . .	1
18.2.2	Multimedia Exposure Models . . . . .	2
18.3	Key Parameters/Inputs for Multimedia Models . . . . .	5
18.4	Examples of Multimedia Modeling . . . . .	8
	References . . . . .	10

**Chapter 19 Quantification of Exposure: Multimedia Monitoring**

19.1	Introduction . . . . .	1
19.2	Why Monitor? . . . . .	1
19.3	Planning and Implementing Issues . . . . .	1
19.4	Monitoring and Sampling Methods, Technologies and Costs . . . . .	3
19.4.1	Method Selection . . . . .	3
19.4.2	Available Methods . . . . .	7
	References . . . . .	12

## **Chapter 20     Exposure Metrics for Multimedia Assessment**

20.1	Introduction . . . . .	1
20.2	Generic Equation for Dietary Intake . . . . .	3
20.3	Estimating Exposure Concentrations . . . . .	4
20.4	Calculating Intake Variable Values . . . . .	6
20.4.1	Consumption Rate . . . . .	7
20.4.2	Exposure Frequency . . . . .	10
20.4.3	Exposure Duration . . . . .	10
20.4.4	Body Weight . . . . .	12
20.5	Calculating Averaging Time Value . . . . .	12
20.6	Combining Exposure Estimates Across Pathways . . . . .	13
20.7	Exposure Models . . . . .	14
	References . . . . .	16

## **Chapter 21    Ingestion Toxicity Assessment**

21.1	Introduction . . . . .	1
21.2	Hazard Identification . . . . .	2
21.3	Predictive Approach for Cancer Effects . . . . .	2
21.3.1	Determining the Point of Departure (POD) . . . . .	2
21.3.2	Deriving the Human Equivalent Dose . . . . .	2
21.3.3	Extrapolating from POD to Derive the Oral Cancer Slope Factor . . . . .	3
21.4	Dose-response Assessment for Derivation of a Reference Dose . . . . .	3
21.5	Sources of Human Health Reference Values for Risk Assessment . . . . .	4
	References . . . . .	5

## **Chapter 22    Multipathway Risk Characterization**

22.1	Introduction . . . . .	1
22.2	Cancer Risk Estimates . . . . .	2
22.2.1	Characterizing Individual Pollutant Ingestion Risk - Scenario Approach . . . . .	2
22.2.2	Characterizing Risk from Exposure to Multiple Pollutants - Scenario Approach . . . . .	3
22.2.3	Combining Risk Estimates across Multiple Ingestion Pathways - Scenario Approach . . . . .	4
22.2.4	Evaluating Risk Estimates from Inhalation and Ingestion Exposures . . . . .	4

22.3	Noncancer Hazard . . . . .	4
22.3.1	Characterizing Individual Pollutant Hazard - Scenario Approach . . . . .	5
22.3.2	Multiple Pollutant Hazard . . . . .	6
22.3.3	Evaluating Hazard Estimates From Inhalation and Ingestion Exposures . . . . .	6
22.4	Interpretation and Presentation of Risks/Hazards . . . . .	7
	References . . . . .	8

## PART IV ECOLOGICAL RISK ASSESSMENT

### **Chapter 23 Overview and Getting Started: Problem Formulation**

23.1	Introduction . . . . .	1
23.2	Overview of Air Toxics Ecological Risk Assessment . . . . .	4
23.2.1	Problem Formulation . . . . .	6
23.2.2	Analysis . . . . .	8
23.2.3	Evaluation of Ecological Effects . . . . .	9
23.2.4	Ecological Risk Characterization . . . . .	9
23.3	Planning and Scoping . . . . .	9
23.3.1	What is the Concern? . . . . .	10
23.3.2	Identifying The Participants . . . . .	11
23.3.3	Determining the Scope of the Risk Assessment . . . . .	12
23.3.4	Study-Specific Conceptual Model . . . . .	12
23.3.4.1	Identifying Receptors of Concern . . . . .	13
23.3.4.2	Identifying Assessment Endpoints and Measures of Effects . . . . .	15
23.3.5	Analysis Plan and Quality Assurance Program Plan (QAPP) . . . . .	16
23.4	Tiered Ecological Risk Assessments . . . . .	21
	References . . . . .	23

### **Chapter 24 Analysis: Characterization of Ecological Exposure**

24.1	Introduction . . . . .	1
24.2	Characterization of Exposure . . . . .	1
24.2.1	Quantifying Releases . . . . .	3
24.2.2	Estimating Chemical Fate and Transport . . . . .	3
24.2.2.1	Physical and Chemical Parameters . . . . .	3
24.2.2.2	Multimedia Modeling . . . . .	3
24.2.2.3	Multimedia Monitoring . . . . .	4
24.2.3	Quantifying Exposure . . . . .	5
24.2.3.1	Metrics of Exposure . . . . .	5
24.2.3.2	Dimensions of Exposure . . . . .	7
24.2.3.3	Exposure Profile . . . . .	9
24.2.3.4	Evaluating Variability and Uncertainty . . . . .	9

References .....	10
------------------	----

## **Chapter 25 Analysis: Characterization of Ecological Effects**

25.1 Introduction .....	1
25.2 Ecological Response Analysis .....	1
25.2.1 Stressor-Response Analysis .....	1
25.2.1.1 Ecological Effect Levels .....	1
25.2.1.2 Selection of TRVs for a Particular Assessment .....	7
25.2.1.3 Stressor-Response Curves .....	11
25.2.1.4 Species Sensitivity Distribution .....	11
25.2.2 Linking Measures of Effects to Assessment Endpoints .....	12
25.3 Stressor-Response Profile .....	16
25.4 Evaluating Variability and Uncertainty .....	16
References .....	16

## **Chapter 26 Ecological Risk Characterization**

26.1 Introduction .....	1
26.2 Risk Estimation .....	2
26.2.1 Single-Point Exposure and Effects Comparisons .....	2
26.2.2 Comparisons Involving the Entire Stressor-Response Relationship .....	3
26.2.3 Comparisons Involving Variability .....	4
26.2.4 Process Models .....	4
26.3 Risk Description .....	5
26.3.1 Lines of Evidence .....	5
26.3.2 Significance of the Effects .....	6
26.4 Risk Characterization Report .....	7
26.5 Evaluating Variability and Uncertainty .....	9
References .....	9

## **PART V RISK-BASED DECISION MAKING**

### **Chapter 27 Risk Management**

27.1 Introduction .....	1
27.2 Role of Risk Management in Regulating Hazards .....	1
27.3 Types of Risk Management Decisions Related to Air Toxics .....	4

27.4	Use of Risk Estimates in Decision-Making . . . . .	5
27.5	Process for Making Risk Management Decisions . . . . .	9
27.5.1	Define the Problem and Put it in Context . . . . .	9
27.5.2	Analyze the Risks Associated with the Problem in Context . . . . .	9
27.5.3	Examine Options for Addressing the Risks . . . . .	11
27.5.4	Make Decisions about Which Options to Implement . . . . .	12
27.5.5	Take Actions to Implement the Decisions . . . . .	13
27.5.6	Conduct an Evaluation of the Action's Results . . . . .	14
27.6	Information Dissemination . . . . .	14
	References . . . . .	15

## **Chapter 28 Community Involvement**

28.1	Introduction . . . . .	1
28.2	Why is Community Involvement Important? . . . . .	1
28.3	When to Involve the Community . . . . .	2
28.4	How to Involve the Community . . . . .	2
28.4.1	Understand Goals, Objectives, and Responsibilities for Effective Community Involvement . . . . .	4
28.4.2	Identify Community Concerns and Interest . . . . .	5
28.4.3	Plan Community Involvement Strategy and Activities . . . . .	5
28.4.4	Identify Possible Tools and Implement Community Involvement Activities . . . . .	6
28.4.5	Provide Opportunity for Continued Public Interaction . . . . .	7
28.4.6	Release of Risk Assessment and Risk Management Documents . . . . .	8
	References . . . . .	10

## **Chapter 29 Risk Communication**

29.1	Introduction . . . . .	1
29.2	Risk Perception . . . . .	2
29.3	Your Risk Communication Strategy . . . . .	2
29.4	Risk Comparisons . . . . .	3
29.5	Implementing Risk Communication Strategies . . . . .	5
29.5.1	Presentation of Risk Results . . . . .	5
29.5.2	Working with the Media . . . . .	8
	References . . . . .	14

## **PART VI SPECIAL TOPICS**

### **Chapter 30 Public Health Assessment**

30.1	Introduction . . . . .	1
30.2	History of Public Health Assessment . . . . .	2
30.3	Relationship of Public Health Assessment to Risk Assessment . . . . .	3
30.4	What Is Public Health Assessment? . . . . .	4
30.5	How Is a Public Health Assessment Conducted? . . . . .	6
30.5.1	Conduct Scoping . . . . .	6
30.5.2	Obtain Study Area Information . . . . .	7
30.5.3	Community Involvement/Outreach/Response to Community Concerns . . . . .	7
30.5.4	Exposure Evaluation . . . . .	8
30.5.5	Health Effects Evaluation . . . . .	9
30.5.6	Draw Public Health Conclusions . . . . .	12
30.5.7	Recommend Public Health Actions . . . . .	13
30.5.8	Prepare PHA Documents . . . . .	13
	References . . . . .	14

### **Chapter 31 Probabilistic Risk Assessment**

31.1	Introduction . . . . .	1
31.2	Tiered Approach for Risk Assessment . . . . .	2
31.3	Methods for Probabilistic Risk Assessment . . . . .	4
31.4	Presenting Results for Probabilistic Risk Assessment . . . . .	6
	References . . . . .	10

### **Chapter 32 Use of Geographic Information Systems (GIS) in Risk Assessment**

32.1	Introduction . . . . .	1
32.2	Selecting a GIS . . . . .	2
32.3	Acquiring and Using Demographic Data . . . . .	4
32.3.1	U.S. Census Data . . . . .	5
32.3.2	Current and Small-Area Demographic Estimates . . . . .	5
32.3.3	Public Health Applications . . . . .	7
32.3.4	Data Access and Distribution . . . . .	7
32.4	Cartographic Concepts . . . . .	7
32.4.1	Generalization, Simplification, and Abstraction . . . . .	10
32.4.2	Map Projections . . . . .	10

32.5	Using the Internet as a GIS Tool .....	10
32.6	Current GIS Applications at EPA .....	11
32.6.1	ORD/ESD .....	12
32.6.2	ATtILA .....	12
32.6.3	ReVA .....	12
32.7	GPS Technology .....	13
	References .....	15

## **GLOSSARY**

## **APPENDICES**

- Appendix A    Listing of all HAPs**
- Appendix B    Guide to Federal Agencies that Oversee Air Toxics**
- Appendix C    Recommended Dose-Response Values for HAPs**
- Appendix D    Methodology for Identifying PB-HAP Compounds**
- Appendix E    Overview of Air Toxics Emission Sources**
- Appendix F    Specific HAPs Included in the National Emissions Inventory (NEI)**
- Appendix G    Atmospheric and Meteorological Concepts Relevant to Dispersal, Transport, and Fate of Air Toxics**
- Appendix H    Data Quality Evaluation**
- Appendix I    Use of Air Monitoring Data to Develop Estimates of Exposure Concentration (Data Analysis and Reduction)**
- Appendix J    Air Monitoring and Sampling Methods**
- Appendix K    Equations For Estimating Concentrations of PB-HAP Compounds in Food and Drinking Water**
